

THE “COMPANION APP” MAKES SURE YOU NEVER WALK HOME ALONE

How to Use the companion App

Free on Android and iOS, the app is a great way to connect with friends or family if you are walking to your car or in an area known for trouble. While this app is in no way connected to Keiser, it could be a useful resource to keep you safe. Once you set up an account, you are able to tell the app where you are going (and it will already know where you are). You can select friends to get a live feed of your location. If you are feeling nervous, with just a click of a button you can have the companions alerted. It will then ask you to periodically confirm if you are ok. If you are in danger, you can click Call Police, and 911 will be called. Your companions do not need to have the app installed. If you select someone it will send them a link so they may monitor you. Those contacted then receive an SMS text message with a hyperlink in it that sends them to a web page with an interactive map showing the user walking to their destination.
